Author, Professor Fox Explains Misconceptions About Writing

BY DON STEPPHENS

STAFF WRITER

A new English professor at Eastern this year, John Fox, was also recently named an inductee of the University of Kentucky Order of the Cardinal and the Middle Tennessee English Professors' Association.

In Fox's first year teaching at Eastern, he has worked on several projects related to the English language, including teaching courses in literature, composition, and writing techniques.

"The English department at Eastern has a strong tradition of excellence, and I am excited to be part of that," Fox said. "I look forward to contributing to the educational experience of our students and sharing my knowledge of the English language."

Fox's research interests include the history of the English language, literary theory, and the role of technology in education. He has published several articles on these topics in academic journals and presented at conferences around the country.

"I believe in the power of words to shape our thoughts and actions," Fox said. "As a writer and teacher, my goal is to help students develop a clearer understanding of the English language and its role in our lives."
It's Time For Students To Be Heard - Vote

The apathy of a 'student body' is more clearly demonstrated when it comes time to vote. In a mock election, for class officers, or for a Homecoming queen.

That being the case, the apathy of Eastern's student body will certainly be put to a test next week. They have the rare opportunity to cast an election, for class officers and for the first runoff for Homecoming queen, this Friday night.

The value of classes at Eastern has been traditionally meaningful simply because very few people ever take the time to vote. The only time that vote are the same ones that can instigate student government operations, work on student publications and are active in Greeks and other organizations.

The result of such elections can show trends and not answer any ultimate questions, students rarely take the time to express a choice. And a govt right down on the line through Homecoming queen, runoff to student government elections. So few care enough to cast a ballot, it's very difficult to get the awareness of the voter, to even the thought, that it could be easily prevented.

The trend appears to be moving enough to cast a ballot, it's very difficult to get enough to cast a ballot, it's very difficult to get even the thought, that it could be easily prevented.

The national campaign for the Presidency has certainly brought strong reactions from many who favor the middle of the road. But most students have seemingly faded into the background of the campaign since the candidates that had the most appeal to the young faded from the picture themselves for one reason or another.

There's the Homecoming queen runs-off that decide the 15 finalists. From there a panel of judges makes the final choice. In past years, the finalists weren't always the 15 coeds that deserved the honor, but rather the 15 whose names were chosen by the biggest voting audience. That seems to be an arbitrary way to elect anything.

So, once again students have a chance to show just how apathetic they really are.

The worst excuse that no choice is offered, thereby making it meaningless to vote, certainly does not apply to either of the three elections scheduled next week.

The senior class, for instance, there takes offers a wide choice of choice. From the radical ADW (American Wily In-digent About Nothing) state to the moderately better preceived Representation), choice runs the gamut.

Maybe if the white man who has always ruled over these minorities for so long, ever thought about bending over and helping a little, maybe he could learn, the struggle for freedom would be practically painless.

If one must not give in to the Eastern students, they are ready to be in student government operations, work on student publications, and are active in Greeks and other organizations.

In the Soviet Union, few individuals have been arrested for just a time in the usual because they portrayed the Russian takeover in Czechoslovakia by displaying signs in Red Square.

But perhaps the biggest struggle in modern history has been among the black people of the United States - a struggle that is supposedly the country of freedom. Your choice is now.

If everyone learned to live together, that's probably one statement the black man has turned over and over in his mind during the past few years. Why can't a nation grant the blacks the freedom they justly deserve? Why must federal troops be dispatched in the South to make the Southern black man can attend school, or register to vote? How can an aroused segregationists appeal to such a large segment of a free voting population?

Maybe if all the bigots who have enjoyed freedom for so long were forced to live on the other side of the fence for awhile, they might see things in a little different light.

People across the world - Korea, Viet- nam, South Africa, Czechoslovakia and even the Soviet Union - have shown black regions to be free and to the nation that a government in which they have no say.

Wouldn't it be logical that the sup- posed leader of the 'free' world would finally wake up and grant equal rights to all?

So that men over there, it's about time we arrive in any minute.

Look out, cause it's coming right on through.

And when that long overdue train finally comes in, it's likely to show the light to all the bigots who have long denied their people. The campaign for class officers has involved more controversy than in previous years. And the candidates finally seem to be offering some form of alleviation. Some have even been known to change in vague campaign slogans that don't really mean anything.

The prime concern of our publication seems to be the fact that our editors and our columns are separate. Whereas, Craig Ammerman, editor-in-chief of the Eastern Progress, is always the 15 coeds that deserved the honor, but rather the 15 whose names were chosen by the biggest voting audience. That seems to be an arbitrary way to elect anything.

Biafra Needing us, Financial Support

In these days of plenty, it's hard for us to imagine what hunger is really like. Very few of us take the time to think about what it is like to be hungry. That is the antithesis of free- dom. That is thought control, for that is the Communists. That is the antithesis of free-

Window Into Wallace Land

While George Wallace goes about dreaming everything and everybody, offering not, more corps and more guns as a solution to the climax of violence that is worldwide in its time, it is fascinating to take occasional looks into Wallace-land itself.

To do this invariably amount the issue of the state of the arts, the arts of the arts, as a result of which we are presented with the more dedicated believers in the wonderland of the arts. They "Live in Georgia," as the report "means," says the report, "that the teachers years old and education than any other governor. And in 1974, the teachers had raised the median pay for teachers to $1400. More than 44 per cent of Alabama males attended college and universities to raise education in Alabama.

Money from the United Nations is as hard and unreceptive as mine. To wake up and suddenly know how to solve a problem that really had you down yesterday is almost like getting up and knowing exactly how you're going to solve the traffic problem on campus. Not perfect, but nevertheless pleasing.

Besides, it's fun to think about figments and ideas that will never be anything but abstract. To be master of imagery is something which only people can create a universe for yourself. And, since pure mathematicians never stop stringing, they never master every concept. Hence, there is no end to the opportunities for enriching your universe.

Mathematics also enthrall themselves by talking sheep. Mathematics is the cut-and-dried chain of Aristotelian deductive logic that some people have proclaimed to be, and its foundations are completely וחיל. So there's a good deal of room for opinion.

To do this invariably arouses the ire of some people. Some of them are probably echoing the words of the old saying, "I'm as demented as I seem to be. But this is a mathematical Chatterton. He lived his vision of the Council structure last week and it appears as if the Council also sees a mathematical Chatterton. He lived his vision of the Council structure last week and it appears as if the Council also sees the same loss of all is in assets today's, their loss is as hard and unreceptive as mine.

Some people have a hard time communicating with youth. They wonder about me when I say things like, specifically. They wonder whether I'm as obsessed as I seem to be. But this opinion (which isn't too likely to improve our reputation any with the crowd) is just a part of the state of mind found in any type of mathematical.

The ask who owns one.

Raymond H. E. Ham, with the reporting department, has decided in the right.

The most important thing to remember is that mathematics fights over opinions. Some of them are almost as bad as competing archaeologists. Also, mathematics is interesting to read about. There was once an even more mathematical Galois who could be a true idol if he were alive today. He was something like a mathematical Cervantes. He lived through nineteen years of hard times, and died in a dark caused partly by politics, partly by a chippy. Some people don't know what to die Galois. Though, I just want to state to my students and tell him to put his name in the paper.

Free Speech

BY JACK FORST

The Eastern Columbia played host to the University of Akron Saturday night and were defeated at 6:15 when the final score was 24-21.

Coach Lou Delaney, 6-6, 246 pounds, and Delisle Showman, a senior end, were key men in keeping the defense of the Colonels. The Eastern Columbia defense was solid with good tackling.

The offense was led by John Wilson, Don Buehler, and John Tiffany who directed a sound running game.

The Colonels will be without the services of reserve quarterback, Tom McCall, a sophomore from the Homestead High School of Euclid, Ohio.

The Colonels trails Eastern 1-0 in the series. Bobby Jack Smith

**The Y-Shop SURPRISE PACKAGE**

We're gonna be open from 8:30 A.M. til 10 P.M. every day the week of the 21st thru the 25th.

Prizes for the best entry:

1. Funniest joke contest (judged by ladies)
2. Grooviest joke contest (judged by dirty old men)
3. Ugliest picture contest — picture can be a friend, foe or yourself — rules posted in U-Shop

Plus — Grand Prize

For the largest purchase between 8:30 P.M. and 10 P.M. during the week — given out Saturday, October 26

Free Cokes given (until the well runs dry)

**Subjects**

1. Finnesse RIFLES' Pledge Program
2. Pershing Rifles is a national honorary society organized in 1919 by General John J. Pershing at The University of Nebraska. Company B-1 of Eastern Kentucky University was chartered in 1955. B-1 attends drill and rifle meets throughout the United States every spring.

3. For information concerning the P.R. pledge program contact any Pershing K. R.L. or B-1's headquarters on the seventh floor of Degree Hall. Drill begins at 5:15 Monday through Thursday in front of Alumni Coliseum.

4. Girls wishing to drill with this year's newly organized "Gupper" unit, practices in at 5:15 Tuesday & Thursday in front of the Coliseum.

**Surprise—**

Come on in...

If not to buy.

Just sit around and laugh.

David F. McKinney

Captain, Pershing Rifles
The Faculty Senate met last Tuesday at 12:00 noon in Ballroom C of the Administration Building to discuss the election of the nine new members of the Senate. A total of 226 votes were cast, with 123 votes cast for the new members. The new members are: John B. Allen, James R. Brown, Donald H. Cottrell, James R. Efford, Robert G. Fink, Leon W. Foote, Charles E. Ford, Robert H. Ford, and Robert H. Weisberg.

The Committee on Elections, chaired by Dr. Byno Taylor, presented the report, which outlined the selection process and the criteria used in selecting the new members. The report was generally well received by the attendees.

In other news, theBoard of Regents approved the budget for the upcoming fiscal year, with a slight increase in funding for the various departments. The new budget is expected to result in a modest increase in tuition fees. Additionally, the Board of Regents approved the appointment of Dr. William Jones as the new Dean of the School of Business.

The college has also announced that the annual Church Music Institute will be held on the campus of Eastern Kentucky University, with guest lecturers and masterclasses. The Institute is open to all interested musicians, and registration is now open. Details can be found on the college website.

In sports news, the Eastern Kentucky University football team won their homecoming game against the rival University of Kentucky, with a score of 35-14. The Eastern defense was strong, allowing only one touchdown in the second half. The Eastern offense was led by quarterback Tim Smith, who threw for over 300 yards and three touchdowns.

A special note of thanks goes to Dr. Berger, who will be giving a seminar on the history of the University of Kentucky at the annual Church Music Institute. His talk will be on the history of the University of Kentucky and its influence on the development of American music. Dr. Berger is a well-respected scholar in the field of musicology, and his talk promises to be informative and engaging.

Finally, the Eastern Progress wishes to extend a warm welcome to all new students and faculty members. We look forward to a successful year of learning and growth together.
Belts Are Back
As Accent Wear
by CAROL LAIRD
Women's Editor

In early Greece, if you wore the active type, you were daggedged you'd be in trouble; whereas the non-actives, who wore softer things over their hips, your chon shorted them. In Rome, a lady's belt was often used to fan her waist and social standing.

In the Middle Ages, when women became popular, the belt changed from a fashion statement to a practical one. A belt was used to keep the skirt in place and prevent it from riding up, especially for women who were on horseback or dancing.

In the 1940s, belts were popularized by fashion designers like Christian Dior and were used as an accent piece to define the waistline, which was seen as the most flattering part of the body. The belt became a symbol of femininity and confidence. Today, belts are still used to accentuate the waist and add a touch of style to any outfit.

Student Discount
Basket Ball representatives were on hand during registration to sell Student Discount Cards. The cards which students can receive discounts from certain merchants are still on sale in the Student Council office.

Playtex invents the first-day tampon
(We suck the inside out so you know how different it is.)

Outside: It’s rubber and silky (not canvas). Inside: It’s extra absorbent... it’s pevons on your first day. Your worst day!

Amazingly, we think we’ve got the old cardboard kind... the Playtex tampon was always more absorbent. Actually 15% more absorbent on the average than the leading regular tampon.

Because it’s different, actually refreshes you. It flowers out. Fluids out. Designed to protect every inch of you. So the chance of a leaking is almost nil.

Try it fast. Why live in the past?

Similar To An Eclipse

BY DONNA FAUST

According to Webster's Second New Collegiate Dictionary, an eclipse means the obscuration of one body by another, or one light by another. The word is derived from the Latin word eclipsis, meaning "a complete disappearance or a partial disappearance of the appearance of a celestial body due to the intervening presence of another celestial body."

In the case of an eclipse, the word refers to the phenomenon of the moon passing in front of the sun, causing the sun to appear as a dark disk. This occurs when the moon is at its closest point to the earth and the sun is directly behind the moon.

The sun, moon, and earth are in a straight line, with the moon between the sun and the earth.

In the case of an annular eclipse, the moon's apparent diameter is smaller than the sun's, so the moon blocks all but a ring of sunlight around the sun's edge. In a total eclipse, the moon blocks all direct sunlight, casting a shadow on the earth.

A solar eclipse is visible only within a narrow, curved path on the earth's surface, called the path of totality. Outside of this path, a partial eclipse is visible.

Solar eclipses do not occur every month because the moon's orbit is tilted at an angle relative to the earth's orbit around the sun. This means that the moon's position in the sky relative to the sun changes over time, and it takes about 18 months for the moon to return to the same position in the sky as it was before the last eclipse.

Astronomers use the term "eclipses" to describe a variety of phenomena involving the moon and other celestial bodies. For example, the term is used to describe a lunar eclipse, in which the moon passes through the earth's shadow, and a solar eclipse, in which the moon blocks the sun from view.

Eclipses are a fascinating phenomenon, and they have been studied for centuries by astronomers and other scientists. Understanding the science behind eclipses is important for predicting when they will occur, and for studying the behavior of celestial bodies.

**Funds Clipped For Student Loans**

WASHINGTON (CPS) — College loans and scholarships represented a 30 percent decrease in 1969-70 for eight Southeastern states.

Of $311 million made available this year, some $35 million will be used to meet the needs of students who would not have been able to attend school this year. Financial aid officers at many institutions noted an increase in student requests based on the smaller figure, but many students had to cut their budget, and the final allotments would be $35 million. The allotment is in line with the $247 million for National Defense Education Act (NDEA) loans cut when they returned to school this year. Financial aid officers at some institutions cut off any students' entire financial aid programs elsewhere.

Mike Whittaker, assistant professor of agriculture and vocational education at Eastern Kentucky University, said that Title III ESEA, Kentucky Region 6, each of the eight components have $190 million. Graduate and professional students may borrow up to $1,000, and teachers and administrative assistants may borrow up to $2,500. The act's "forgiveness" program allows cancellation up to $5,000. Under provisions of the National Defense Education Act, a three percent interest on compelling evidence at the Office of Student Financial Aid, Washington, D.C., on Aug. 9, with construction to begin in October for further information regarding the program.
