THE KENTUCKY

High School Athlete

FOOTBALL CHAMPIONS WILL SOON BE DETERMINED

Within the next few days the first K.H.S.A.A. Football Championships will be inaugurated. Increased attendance at regular season games in 1959 when regional standings were involved indicate that Kentucky football lovers approve of the play-offs.

Official Organ of the **KENTUCKY HIGH SCHOOL ATHLETIC ASSN.**

NOVEMBER - 1959

THE FOOTBALL CHAMPIONSHIPS

Just about the time this issue of the ATHLETE reaches the member schools of the K.H.S.A.A., the regional football championships in Classes A and AA will have been determined. A week or two later the same will be true for Class AAA.

In Classes A and AA the winners of Region 1 and Region 2, and the winners of Region 3 and Region 4 will play in semi-final games on November 20 or 21. The winners in Region 1 and Region 3 will determine the semi-final sites this year under regulations previously announced. The final games in these classes will be played on the Thanksgiving weekend. The sites for these games will be determined by the Commissioner under authority delegated to him by the Board of Control.

Teams in the two Class AAA regions will close their seasons on the Thanksgiving weekend, and the regional champions will play in Louisville on the first weekend in December.

Regional championships will be determined by the Dickinson System. This system as now used by the K.H.S.A.A. is as follows:

THE DICKINSON FOOTBALL

RATING SYSTEM

SECTION I

1. First division includes all teams that have won more games than they have lost during the season. Others are second division teams.

2. For each victory of a first division team over a first division team the winner gets 30 points and the loser 15 points.

3. For a tie between two first division teams each team gets 22½ points.

4. For each victory of a first division team over a second division team the first division team gets 20 points and the second division team gets 10 points.

5. For each victory of a second division team over a first division team the winner gets 30 points and the loser gets 10 points.

6. For each victory of a second division team the winner gets 20 points and the loser gets 10 points.

7. For each tie between second division teams each team gets 15 points.

8. For each tie between a first division

team and a second division team the first division team gets 15 points and the second division team gets 20 points.

SECTION II

1. No team shall be penalized for a victory in an extra game. To avoid this, the extra game shall be omitted from the calculation.

2. If two second division teams have won the same number of victories over first or second division teams, but have lost a different number of games to first division teams, the extra defeats shall be omitted from the calculations.

SECTION III

1. An undefeated team shall always be ranked above every team it has defeated, even though the average number of "points" in the season's ratings may indicate otherwise.

2. A team with a percentage of .500 is in the second division. It will be considered to be in the first division if one third of its games have been with first division teams and have resulted in at least one tie and one victory.

3. If, in a game having a bearing on the championship, a first division team should profit by tying another team in the first division, when defeating it would lower the defeated team into the second division, the place of the teams in their divisions shall be determined without considering this game.

SECTION IV

1. If the foregoing directions have been accurately followed, the final standings may be determined by getting the average number of points.

2. If two teams have the same average points for the entire season, the victor in the game played between them during the regular season shall be ranked above the loser.

3. If three teams have the same number of "points" for the entire season, and two of them have played each other, the loser in this game shall be ranked third and the other two tied for the highest rank.

(Do not attempt to apply this system until all of the games of the season have been played.)

Playing For Keeps

Editor's Note: This is the address delivered by U. S. Commissioner of Education Lawrence G. Derthick on June 28, 1959, during the National Federation Annual Meeting.

You know well your accomplishments but permit me, as one who has been two and three steps removed from your activities for a number of years, to review a few of your accomplishments as I sense them from my distance.

You have:

1. Brought system and order out of confusion and have established safeguards and controls to prevent evils and destructive influences in areas in which our youth are most sensitive to forces for good or bad.

2. Kept the control of interscholastic athletics in the hands of school authorities and generated such powerful strength at State levels as to discipline effectively local communities.

3. Promoted wide acceptance of high standards of ethics and sportsmanship.

4. Associated yourselves nationally so as to benefit from all of the good fruits of pooling intelligence and experience and sharing and disseminating the best ideas and the best practices. Naturally you have many, and I am sure serious problems besetting you, but you have the know-how and the machinery to solve them.

5. Undergirded a national program of interscholastic athletics which has engendered in youth the highest values of physical, mental, and moral strength. (I could cite the evaluation of the merits of our soldiers and their power for initiative and resourcefulness in battle credited in part to their developmental experiences in athletics.)

6. Evolved standards and practices to extend conditions of safety and safety practices throughout the country so as to prevent untold and needless suffering.

Let us consider now, against such a background, **What of the Future?** This, of course, must be examined against the future of education. Think with me then about some of those aspects of education's future that will

bear upon your programs. If you really mean to "Play for Keeps"—to keep your gains and move forward in times like these—you must rise to the challenges that are hard upon us.

One of the most significant, foreseeable developments for the next ten years is that we shall have new standards of excellence. This carries no implications of reflections upon our schools of today which are better than they have ever been. It only means that because of the explosion of knowledge that has taken place there is a tremendous expansion in learning needs and a sharply increased demand for trained manpower so that our schools must attain new standards of excellence to satisfy the requirements. The better schools of today reflect an American system of education that has no superior. Our problems stem largely from our poorer schools which are suffering from neglect.

People are realizing more than ever the significance of education in the present world-wide race for knowledge. This is among the reasons why a number of responsible bodies and leaders are calling for a doubling of educational expenditures. With a doubling of expenditures people will demand, and we can provide, much higher educational standards and increased efficiency. We shall be much better able to attract and hold top talent and to provide modern services and resources to improve quality.

Another indication of the new standards of excellence just ahead is the fact that we are beginning to accelerate educational research. Industry has been spending from five to fifteen percent of its operating budget for research, whereas in education we have only spent a small part of one percent. Research will open many doors, including an extension of the use of electronics, TV, and all the newer media.

Against these new standards of excellence you must do your future planning and prepare for forthright action to meet the demands. One of the major needs is to extend the best in your philosophy for application to all boys and girls. As we close the gap

National Federation Basketball Test

Part II of the National Federation basketball examination will be given all over Kentucky on Monday, December 7, to officials who wish to work for the "approved" and "certified" ratings. Officials registered with the K.H.S.A.A. for the first time this year and who have not been registered previously in any other state associations, are not eligible to take the test. Those interested should advise the State Office immediately in order that necessary arrangements can be made with the school administrators who will supervise the taking of the exam. Officials living in Kentucky need not suggest the name of an examiner. The "approved" rating does not carry forward from year to year, but must be earned each year. After an official has received the "certified" rating, he keeps this rating by attending clinics without having to continue to take the exam each year.

Approved and Certified Officials

Twenty-seven football officials have qualified for the "certified" rating this fall, and twenty-five for the "approved" rating. These officials are:

Certified Officials—Thomas Bell, Howard Bennett, George W. Brown, E. C. Calman, Jr., Travis Combs, John S. Crosthwaite, Jr., Jack H. Durkin, Carl Elovitz, Robert H. Florence, W. H. Gammon, Newell Hadden, Frank Hall, Gene Harris, Fletcher Holeman, Bernard Johnson, Carl Lawson, Bob McCollum, Edgar McNabb, E. B. May, Jr., William

A. Mordica, Bill Nau, Doug Noland, K. F. Schmitt, John H. Shaw, Clifton Stone, Don C. Sullivan, Ray Varner, Bart Hagerman.

Approved Officials—Charles J. Baker, John Bartels, Clarence T. Bell, John Canter, David A. Carlson, Dan Chambers, Jr., John W. Forbes, Jr., Bob Fortney, E. Hugh Fugate, Billy Joe Golden, James Graham, Frank Heinze, John G. Heinze, William Holbrook, Kenneth Kerr, Jim Melmige, James Moss, Ted Osborne, Gresham Sacra, Deward Saylor, Bill Scott, William D. Stevens, David G. VanMeter, Philip Vinciguerra, Shirley Watts, Ed Hanas.

MINUTES OF BOARD MEETING

The Board of Control of the Kentucky High School Athletic Association met in the K.H.S.A.A. building, Lexington, on Saturday morning, October 17, 1959. The meeting was called to order by Vice-President Louis Litchfield, at 10:00, with directors Robert P. Forsythe, W. H. Crowds, Jack Dawson, K. G. Gillaspie, W. B. Jones, and Cecil A. Thornton; Commissioner Theo. A. Sanford, and Assistant Commissioner J. B. Mansfield present.

Jack Dawson moved, seconded by W. H. Crowds, that the reading of the minutes of the July 31st meeting be waived, since the members of the Board had received copies of these minutes. The motion was carried unanimously.

Chairman W. H. Crowds of the Football Championship Committee reported that he had attended a meeting of school administrators and coaches, held at the Beaver Dam High School on the evening of October 1 for the purpose of creating interest in football among the school representatives of the Fourth Basketball Region. Also in attendance at the meeting were Coach Nick Denes of Western Kentucky State College and K.H.S.A.A. director Bob Forsythe. Mr. Crowds stated that it was his opinion that some of the schools in the area involved would inaugurate football within the next two years.

There was a discussion of the forthcoming football playoffs, and the Commissioner was authorized to put into effect and carry out the regulations previously adopted by the Board of Control.

Chairman W. B. Jones of the Trophy Committee reported that his committee had met and had selected district and regional basketball trophies which would be used in the forthcoming 1960 tournaments. Mr. Jones said that the trophy specifications were now

being prepared for the bidders. Robert P. Forsythe moved, seconded by Cecil A. Thornton, that the report of the Trophy Committee be accepted and approved. The motion was carried unanimously.

Jack Dawson moved, seconded by K. G. Killaspie, that Edgar McNabb and Joe Ohr be named respectively delegate and alternate to the forthcoming meeting of the National Federation Football Committee. The motion was carried unanimously.

The Commissioner stated that it might be necessary for the K.H.S.A.A. to borrow some money prior to the time of receiving 1960 State Basketball Tournament money, this plan probably being more advisable than that of selling bonds or transferring money from savings accounts. W. B. Jones moved, seconded by K. G. Gillaspie, that the Board of Control authorize Commissioner Theo. A. Sanford to borrow during the fiscal year 1959-60 for the purpose of paying current bills and salaries an amount not to exceed twenty thousand dollars (\$20,000). The motion was carried unanimously.

W. B. Jones moved, seconded by Cecil A. Thornton, that the next meeting of the Board of Control be held in Lexington on December 19, 1959. The motion was carried unanimously.

K. G. Gillaspie moved, seconded by Cecil A. Thornton, that all bills of the Association for the period beginning July 31, 1959, and ending October 16, 1959, be allowed. Included in these bills were a few K.H.S.A.A. Protection Fund bills, totaling \$190.16. The motion was carried unanimously.

There being no further business, the meeting adjourned.

SUPPLEMENTARY LIST OF MEMBER SCHOOLS OF THE K.H.S.A.A.

(List Compiled November 1)

Auxier	Foundation
Beaver Dam	(Berea)
Betsy Layne	Garrett
Carr Creek	Good Shepherd

M. J. Cavana
IN MEMORIAM

M. J. "Bud" Cavana, faculty member of the Newport Junior High School and a member of the K.H.S.A.A. State Swimming Committee, died in Bellevue, Kentucky, on September 13, 1959. He is survived by his wife, Jane, and his two sons, Jim and Jeff.

The passing of "Bud" Cavana is felt deeply, not only by his own community of the greater Cincinnati area but also by hundreds of friends throughout Kentucky. He was a graduate of Newport High School and of the University of Kentucky. He was a member of the basketball and football squads at the University, lettering in football. Although he had coached several sports, his particular interest was swimming, both at the local and state levels. He was coach of swimming at Newport High School at the time of his death and had been for several years.

The first unofficial State Swimming Meet was held at the Morehead State College pool

on March 28, 1942, this being an invitational affair sponsored by the Boosters' Club of Newport and managed by M. J. Cavana. He managed a similar meet at Eastern Kentucky State College in March of 1946. When the first official K.H.S.A.A. State Swimming Meet was set up by the Association's Board of Control in 1947, it was only natural that "Bud" Cavana be named a member of the State Swimming Committee. Since that time, through his interest and devotion to swimming, he has been instrumental in keeping this sport alive in the K.H.S.A.A.

Having conducted many swimming meets, both A.A.U. and high school, Mr. Cavana was in a position to do much for the sport in a capacity where capable leadership was hard to find. He organized and promoted the first conference swimming meet in Kentucky, that of the Northern Kentucky Conference, several years ago. He coached hundreds of boys and girls in swimming, not only in his community but also out of the state. His leadership will be greatly missed by all of his friends in sports and especially by the members of the State Swimming Committee.

—A.R.

SUPPLEMENTARY LIST OF REGISTERED FOOTBALL OFFICIALS

(List Compiled November 1)

If one telephone number is given for an official listed, it is the home phone number unless otherwise designated. If two numbers are given, the first number is that of the home phone.

Why Boys Play Football

Much has been written on competitive sports. It is a favorite theme of the banquet speaker. We have been well briefed on why a boy should participate in football and other bodily contact sports. We know of the benefits to the individual—physical, social and moral. We know too, that society benefits by having added to it individual members who are stronger, braver, and cleaner by having played the game.

All that we can readily understand. Now approaching it from another angle, why do boys play football?

What is the lure of the game that is so demanding in this era of high pressure competition? To the public, football is a dramatic spectacle that provides relaxing week ends throughout the fall months. It is a meeting place for old grads and a rallying point for all students and alumni of the school. But to the players? To them it is a field of hardship, sacrifice, discomfort and danger in a land of abundance and luxury. Why do boys, of their own accord, choose to play the game?

Football offers the age-old challenge to man's spirit. It is the challenge of danger and hardship that has lured the strong and the brave to sail uncharted seas, to scale mountain peaks, to explore new lands and

trace their rivers to their sources. Then there is the lure of companionship. The bonds of companionship become stronger when an experience of danger or hardship is shared with your comrades. When boys bow down in the huddle together and brace themselves shoulder to shoulder in a goal line stand, they gain a new concept of companionship. There is a close bond and understanding among those who have worn the cleated shoes in varsity competition. In most areas of our modern society, we must accept a person at his own evaluation. In more primitive times, danger and hardship were ever present and a man was more often required to exhibit his courage and fortitude in the presence of his associates. Now he has more means of concealing his frailties. But on the football field, there is little to hide behind. The mask of pretense is removed and you see the man as he really is.

Then there is the lure of adventure and the lure of conquest. The same appeal that led Marco Polo to the Far East impels a boy to walk up to the coach and ask for a uniform.

So as you look down on that gridiron this fall, you will see there the strong, the bold and the daring. You will see the spirit of Lancelot and stout Cortez. It is the spirit that has conquered, explored and built empires. Moreover, football not only attracts the strong, but it builds greater strength into the lives of those who are lured to it.

AND WHY DO BOYS PLAY FOOTBALL? When Wilfrid Noyes was asked why he climbed the Himalayan Peaks, his reply was, "I climb because I like it." George Mallory's classic answer to this question was, "Because it's there." Many boys play football because it's there. Let's keep it there for the bold young explorers of tomorrow!

—Dwight Keith, Coach and Athlete.

High School Swimming Rules

by Charles E. Forsythe

The meeting of the Point National Collegiate-National Federation Swimming Rules Committee was held at Fort Collins, Colorado, April 16-18, 1959. I attended this meeting as a representative of the National Federation of State High School Athletic Associations. David Robertson, Swimming Coach, New Trier High School, Winnetka, Illinois, advisory member representing the Interscholastic Swimming Coaches Association of America, also was present. The changes indicated below are those which will affect interscholastic swimming for 1959-60 season.

RULE 1, SECTION 4 - ORDER OF EVENTS

The position in the order of events of the 100 Yard Freestyle and the 100 Yard Breaststroke has been reversed. In other words, the 100 Yard Breaststroke will be event No. 5 and the 100 Yard Freestyle will be event No. 6 in dual and championship meets.

Also, in the order of events the 150 Yard Individual Medley will be replaced by the 200 Yard Individual Medley in 75 foot pools. The 120 Yard Individual Medley in 60 foot pools will be replaced by one of 160 yards in length. The Breaststroke is the new stroke which will be added to the Individual Medley.

In Section 4 in the Rules Book a note will appear to allow state high school athletic associations in each state, if they desire to do so, to permit a change in personnel of relay team members competing in a state meet from those who may have qualified in a preceding district or regional meet. This procedure is not mandatory to a state but it will allow for substitutions, if desired, for original district or regional qualifiers, in relay only, who may take part in a state meet held later than the date of district or regional qualifying meets.

RULE IX, SECTION 1 - BREASTSTROKE

The first sentence in this Section will be deleted as also will be the provisions of Part (e) of Section 1. The new Section 1 (a) will read as follows: "The Breaststroke must be swum on the surface. Following the take-off and each turn, one arm pull and one leg kick may be taken under water, but some portion of the contestant's head must break the surface of the water before another stroke is started. Except for this provision, some portion of the contestant's head must be higher than the normal, flat surface of the water at all times."

RULE XII, SECTION 1 INDIVIDUAL MEDLEY

With the change in the Individual Medley to races of 200 yards and 160 yards in 25 yard and 20 yard pools, respectively, there is no need for the Second Section previously included in this Rule. The heading will be changed to read "INDIVIDUAL MEDLEY - INTERCOLLEGIATE AND INTERSCHOLASTIC." Section 1, as it applies to high schools, now will read as it has been in effect for this event in intercollegiate competition as follows: "The Individual Medley shall be a race in which the first one-fourth of the distance shall be Butterfly Stroke, the second one-fourth Backstroke, the third one-fourth Breaststroke, and the last one-fourth any stroke other than the first three."

The Flying Dutchman

Almost 2500 officials, coaches, players and fans turned out for the Basketball Clinics. With the personable Joe Billy (Assistant Commissioner) serving as navigator on our eastern swing, we not only were lost in the Kentucky Mountains most of the time but we also were snowed under with the fine hill country hospitality. The same famous hospitality was in evidence in the western section but with the "Navigator" back in his Lexington office the meetings lost some of the color provided by the "Personable One's" jokes.

Officials all over Kentucky were directed to emphasize four phases of officiating in their decisions this year:

(1) The ball must be tossed correctly and NOT CARELESSLY for the jump. It must be tossed at right angles to the floor and higher than either of the jumpers can jump.

(2) Administer the running rule strictly. Do not permit players to get away with those extra steps.

(3) Don't call fouls on those defensive men who execute fine guarding plays against the shooter. It is felt that many times a shooter gets free shots when his guard should be receiving praise instead of penalty.

(4) When a coach comes on the floor without permission or verbally abuses an official, **A TECHNICAL FOUL MUST BE CALLED.**

Already the sixteen regional representatives of the K.H.S.A.A. are starting to set up their training sessions. The youthful Briscoe Inman, who trains the whistlers in Region 12, is "one the ball." "Brainy Briscoe" has mailed 150 letters to all coaches and officials in an 80-mile radius of Danville, advising them of his clinic on mechanics at Centre College gymnasium in November. Briscoe is also going to emphasize proper dress and ethics. For this he is to be commended.

Irby Hummer, the Hodgenville financier and golfing enthusiast, gets a Corn Cob Pipe Award this month for his work with the South Central Officials Association. Irby is president, Bill Strange is vice-president, Cliff Reed is secretary-treasurer and "Jolly Kean" Jenkins is director of public relations. Irby's aim at the development of trained officials with professional attitudes won the award for him.

James Pheane Ross of Lexington got this month's second cob award for his work with recreation in Kentucky. Pheane says he

treasures his award highly and that the pipe, horseman and certificate are proudly displayed. In Pheane's words, "The horseman is riding at full gallop on my desk and the certificate is hanging close by."

As soon as the Dutchman finishes this column he will set his sights on the Indiana Education Association which meets in Indianapolis in October. Commissioner L. V. Phillips of the Indiana High School Athletic Association has invited the Dutchman to speak to his association of principals, coaches and officials at the I.E.A. The Dutchman gave Colonel Phillips two subjects to select from namely, "Will Officials Go To Heaven," and "Hardwood and Hardheads." The Commissioner chose the latter saying that if one per cent of our hardheads come to the meeting, you will have an overflow audience. I guess he already knew the answer to the first subject.

One thing was especially enjoyable about this year's clinic tour. For the first time in the Dutchman's 18 years of clinic work for the K.H.S.A.A., a member of the Board of Control accompanied him on a part of the trip. "Johnnie" Crowdus made a hit at the sessions he took part in. "Johnnie" also made a score at the State White House Conference on Youth held this month. An expert in the Field of Recreation, Board Member Crowdus made his presence count at the meetings.

Being a golfing duffer this thought occurred to us at Hazard. Goebel Ritter, who is regarded as the longest driver in the mountains, should be put in a foursome with "Johnnie" Crowdus who relies on brain instead of brawn for his victories, Kean Jenkins who talks you out of holes, and Pikeville's Dick Looney who is now having a hard time hitting the small white ball because of his expanding mid-section. A lot of people would pay money to see that foursome.

Murray's Garrett Beshear gets credit for being the best material for that town's Chamber of Commerce. Sitting beside Garrett at Mayfield, we got the best lecture on the beauties and advantages of that western city that could be given. Undoubtedly one of the greatest basketball players of all time, this popular fellow loves young people, sports and Murray State. He is a credit to them all.

Starting with this column, the Dutchman is trying to find the most indefatigable official in the Commonwealth. By the end of the year we hope to properly recognize that official basketball or football, who has accumulated the greatest number of years and

has officiated the most seasons. Send your nomination, a picture of the gentleman, and a very short story to The Flying Dutchman, Armory Building, Louisville 2, Kentucky.

This month's nominations are the University of Louisville's "Jolly John" Heldman, Jr., and "Rovin Jack" Thompson, who might be found calling games anywhere in "Inner or Outer Space." Our information on these two is not reliable but we believe that between them they have been officiating almost one hundred years. Neither shows any indication of slowing up or retiring. Whom do you know who can match these "ageless arbiters?" Who will be Mr. Methuselah of 1960?

The Dutchman is following a new policy of closing each column with a bit of Dutch philosophy. Here goes for this month: One of the great things about living in a democracy is that we have complete control of how we pay our taxes. We may pay by cash, check or money order. Did you know that an unkind remark is like a killing frost? No matter how much it warms up later, the damage remains.

PLAYING FOR KEEPS

(Continued from Page One)

between philosophy and application we are driven by our ideals of the sacredness of the individual and by the demands for trained manpower in this scientific age, with a kind of competition we have not heretofore known. We will be more concerned than ever by the high school dropouts, as well as the athletic letfouts.

You must, therefore:

1. Advance your far-reaching programs of interscholastic athletics. Their role is extremely important for all of the values I cherished and served as a high school principal.

2. Actually bring philosophy and practice together through intramural programs. New standards of excellence will no longer tolerate restricting these values to the few. Imaginative procedures must be planned and executed for bringing glamour and success to intramurals or any other sound means for reaching all with these experiences.

3. Take leadership in bringing into balance recognition for all pupils who achieve, whether in academic pursuits, athletics, or otherwise.

4. Have ample resources in teachers and coaches to do the job better—intramurals

incidentally will elevate the quality of interscholastic athletics.

5. Secure adequate support from public funds for all such activities.

6. Look ahead—rise above immediate problems of the day. Face and deal with the pressures that restrict wider application of the best in your philosophy.

7. Extend the techniques of research and experimentation and the facilities of the mass media to your field.

Your leaders, in writing about my assignment, asked me to give something of my experiences heading the first official educational mission from our country to the USSR. There will be very little time for that, but let me say briefly in passing that the major impression of our delegation had to do with the attitude toward education on the part of the Russians, sparing no expense in their conviction that in the race for knowledge education is the prime instrumentality to use in "reaching and overreaching America." They are convinced that they will attain their objective with trained minds.

The Russians are enthusiastic about sports and have a deep love for them. But they seem chiefly concerned about providing for a wide degree of participation by all boys and girls. They put great emphasis upon physical education and health, including intramurals, and provide one full-time doctor for each two schools and one trained nurse for each school. Such is their interest in health, physical education and athletic activities.

My subject reminds me of a conversation I had with the Minister of Education in USSR. We were arguing the relative merits of our two systems of society. He said, "You believe in individual initiative; we believe in a planned society—let time tell." Meaning, in his mind, that time would prove that his side was right. But we know a planned society has limitations, whereas in a democracy there is no limitation beyond that which we impose upon ourselves.

This challenge means that we must stop taking our blessings for granted and give our best without limit to strengthen democracy. One of the approaches is to provide a good strong program in which all boys and girls will have the benefits of athletics, intramurals, and physical education.

As we contemplate the next ten years we know beyond doubt there will be great efforts to overcome the disadvantages of small schools through consolidation of school dis-

tricts. You have an opportunity, therefore, to develop an athletic blueprint for new consolidated school districts. It is an opportunity to prevent bad and promote good practices.

And, since for a number of reasons, we shall continue to have in the next ten years many small schools, there is the challenge for you to invent and promote ways to enrich small schools. For example, in other aspects of school programs there is experimentation with multiple classes, supervised correspondence courses, school aids, electronic communication, flexible schedules, and shared services, in order to bring enrichment to these youngsters who suffer from the restrictions of small schools.

Thus, perhaps you could invent a system of flexible schedules and shared services to give a good coach to each of several schools; perhaps you could develop a system of joint teams and certainly intramurals. The sky is the limit in what you may try.

As industry and government and the military are providing continuing programs of intensive training for executives, we in education need to extend opportunities for our leaders. For years you have been leaders in providing schools for coaches. You are on the right track and you need to extend these opportunities because we are going to need many more coaches in the next ten years, trained up to the minute.

Changes are constantly taking place in physical plants. What are you doing to contribute ideas, putting invention into play; what changes in buildings and equipment should there be for your programs?

Before concluding I want to cite **certain values that will not and must not change.** I refer to those experiences related to your unique opportunities to get close to children and youth and move deeply in their hearts. As a school principal I often would say that I wouldnt have a school without athletics, and I wouldnt have athletics without the kind of controls that your associations have developed.

I wish I might cite case after case that I cherish in which I have seen your programs reach the hearts of youth. I have seen boys and girls learn to extend the rules and practices of good sportsmanship, fair play and teamwork to all of their relationships. I am thinking also of the spiritual and character values of good clean sports and vigorous sportsmanlike competition. These are values that must be reemphasized and extended in times like these.

A Job To Do

Good sportsmanship is the "most noble" of all interscholastic athletic program objectives to a great many leaders in education. The opportunities for teaching and for acquiring this fine attitude are abundant in sports. Unfortunately, wrong attitudes are just as easy to acquire if the contests are permitted to degenerate to demonstrations of poor sportsmanship.

Each of the groups concerned with athletics, that is the administrators, officials and coaches, have a definite responsibility to have all games played in as sportsmanlike atmosphere as possible. This is not an overwhelming responsibility, but it does require planning, courage, determination and vigilance to insure maximum benefits.

Good sportsmanship is not a complicated attitude. It can be easily defined and readily recognized. Fortunately, violations can be detected just as easily.

Good sportsmanship simply means playing the game according to the spirit as well as the letter of the rule; it means the winner does not gloat nor does the loser alibi. Those with leadership responsibility must make certain these simple tenets are observed.

When an official agrees to work a game he accepts the responsibility of enforcing the rules. A traditional rule requires football officials to penalize promptly for unsportsmanlike conduct on the part of coaches and players. With all due respect to the excellent manner in which most football officials discharge their game responsibilities, many have not been as vigilant in penalizing this foul as they could and should be.

The Alliance Football Rules Committee recognized this fact when, at its most recent meeting, it strengthened, as much as possible, the rule prohibiting coaching from the sideline and all unsportsmanlike conduct.

The Rules Committee has traditionally provided officials with the tool they need to enforce penalties for violations of unsportsmanlike conduct. It is up to the officials to discharge their responsibilities so that violations of this rule are penalized promptly. Officials must supply the initiative and the courage and determination to enforce the rules.

The Rules Committee has provided the tools—the officials must put them to work.

—Clifford B. Fagan.

Basketball Hall of Fame

By Lyle T. Quinn, Iowa H.S.A.A.

The National Association of Basketball Coaches in 1936 was successful in raising sufficient funds to send Dr. and Mrs. James Naismith to Berlin to attend the 1936 Olympics. The honors heaped upon Dr. Naismith gave evidence of the world-wide spread in the importance of basketball as an international game. The National Association of Basketball Coaches immediately thereafter began exploring ways and means for the creation of a permanent memorial to the game of basketball and its founder. In 1948 the first Basketball Hall of Fame Committee was organized and funds were subsequently voted to carry on its activity and an office was set up at Springfield College, where the college administration furnished the necessary facilities. Springfield College was the natural location for a basketball hall of fame since it was there in December of 1891 that the first game of basketball was played under the direction of Dr. Naismith, who had on several subsequent occasions, indicated that it was his wish and desire that should a memorial to the game ever be established, it should be established at Springfield, the birthplace of the game.

The plans have been completed for the creation of a building to cost approximately one-half million dollars. Construction is planned to be started early in the Fall of 1959. An investment of \$1,000 in the Hall of Fame Building by an institution carries with it an institutional membership in the corporation with a voice and vote. A personal investment of \$100 carries with it a life membership in the corporation. A \$25 investment carries a five-year membership. Any such investments may be paid in full or by suitable installments over a period of time convenient to the investor.

The Hall of Fame for Basketball will be operated under the direction of an Executive Committee selected by the members of the National Association of Basketball Coaches and from the responsible groups and individuals vitally interested in basketball. The title to the property will be held in the name of the "Basketball Hall of Fame, Incorporated," a non-profit organization created to handle all legal, financial, contractual and business matters incidental to the project. The physical maintenance will be covered through the budget of the corporation and carried on through cooperative ar-

rangements with Springfield College. Janitorial and housekeeping duties will be under the supervision of the College, acting for the corporation. The annual financial budget will be provided from door fees and from concession sales at the museum, increased as needed by contributions, by receipts from special games, and income from endowment funds. Experience in similar projects has indicated that when the museum and library become going concerns the plant will be fully self-supporting. Every member of the corporation will have a voice in the direction and management of this tangible evidence of interest and appreciation of those not only directly connected with and engaged in basketball activities, but also those millions who must engage as onlookers and supporters.

The building will house a museum which will reveal a basketball history in terms of souvenirs and mementos of the founder, former players, coaches, teams and institutions. A pageantry of growth of game in terms of equipment, playing areas, and spectator space. A replica of gym room where the game was first played, with markings indicative of change to date serving as a main display room.

The building will house a library containing complete historical coverage to the present and also containing a collection of all books, magazines, papers, and other printed material pertaining to basketball for the purpose of providing a working library for students of the game. The building will house a stage and equipment necessary to present movies, demonstrations and addresses. A memorial room which will include many personal effects of Dr. Naismith, the original first draft of the rules of the game as typed by Dr. Naismith himself, and many other important and historical items.

A selection of individuals to be honored in the Basketball Hall of Fame will be made by the Basketball Hall of Fame Honors Committee which consists of 13 members, one from the city of Springfield, Massachusetts, two active members of the National Association of College Basketball Coaches, two Executive Secretaries of State High School Athletic Associations, one member of the Y.M.C.A., one member of the A.A.U., one active member of the International Board of Approved Basketball Officials, two from the Press, Newspaper, Radio and/or Television, two from the Sporting Goods industry, one from the field of professional basket-

ball. The first Honors Committee was appointed on March 21, 1958, and proceeded with the tremendous task and responsibility of drawing up the rules and regulations to be followed by the Honors Committee. One of the requirements of the Committee is that a person elected to the Hall of Fame must receive ten (10) affirmative votes of the thirteen members of the Committee. During the year of March, 1958 to March, 1959, the Honors Committee elected Dr. James Naismith, his original team of nine players and three old-timers to the basketball Hall of Fame. The Honors Committee held their first meeting in Louisville, Kentucky, March 17, 1959. The second meeting of the Honors Committee was held in Chicago on occasion of the Pan-American game August 30, 1959. The Honors Committee is in the process at the present time of screening applications of individuals who are candidates for election to the Hall of Fame.

Here and There

A recent nation-wide survey of Junior High School interscholastic athletics reveals basketball is played in more schools than any other sport. On the basis of the number of teams participating, the first ten most popular activities rank in this order: basketball, track, tackle football, baseball, softball, swimming, wrestling, soccer, tennis and volleyball.

Willard B. Knowles, upon the expiration of his term as President of the Federated Council for the CALIFORNIA Interscholastic Federation Protection Fund, was commended for services rendered to high school youth in California by Dr. Roy E. Simpson, Superintendent of Public Instruction and Director of Education for the State of California Department of Education. Mr. Knowles was cited for "exceptional professional leadership in serving as President of the Federation Council and for his willingness to accept this important post and for unselfish devotion to the service of high school youth in California." Mr. Knowles is presently an Executive Committeeman from Section 7 and Vice-Chairman of the National Alliance Football Rules Committee.

The ONTARIO Federation of School Athletic Associations, Toronto, Ontario, is comprised of nine separate Associations. There are 329 school with a total enrollment of 203,535 in these nine Associations, which include both public and private schools. The

Federation, which has a budget of approximately \$25,000 annually, sponsors a full program of 16 sports, including rugby, basketball, track and field, badminton, cross-country, curling, golf, gymnastics, hockey, rugger, skiing, soccer, swimming, tennis, volleyball and wrestling. Including the senior, junior and sub-junior divisions, there are 372 teams playing rugby, with 10,150 boys participating. There are 631 schools sponsoring basketball teams in the three divisions and providing competition for over 7,770 boys. Track and field, with the greatest number of teams (701) provides competition for over 9,000 boys. 93 schools sponsor volleyball, 59 badminton and 57 hockey. N. A. Beach, who attended the National Federation's annual meeting at Chattanooga during the past summer is the Federation's executive Secretary.

CHARLES VETTNER, former member of the National Basketball Rules Committee and the Kentucky rules interpreter, again this year conducted the annual state-wide invitation basketball rules clinic for the Indiana High School Athletic Association, held at Indianapolis on Saturday, September 26. It was the meeting's purpose to discuss rules interpretations, officiating techniques and official rulings for the coming season. The clinic was attended by Indiana instructors and men who will act as interpreters for sectional clinics.

STEPHEN EPLER, inventor of 6-Man Football and Chairman of the 6-Man Football Rules Committee, recently became the 28th member elected to the Nebraska Sports Hall of Fame. Epler, who is presently the Superintendent and Principal of Reedley College, Reedley, California, invented 6-Man Football while attending a summer session at Nebraska University. During his Master's thesis preparation, Epler considered the athletic problems facing the small high schools which had no football team or such small squads they were unable to compete equitably with other schools. Some small schools were unable to field football teams because of the cost of outfitting a 25 or 30 man squad. The game Epler proposed required less expensive equipment, fewer players, reduced the danger of injuries and provided an opportunity to compete in an activity offering physical contact through blocking and tackling. The first 6-Man game was played at Hebron, Nebraska on October 3, 1934 between the schools of Hardy-Chester and Belvidere-Alexandria. The game was

well attended. The new sport grew rapidly, being played by small schools all over the country. At the present time there is a swing to 8-Man Football but there still are over 60 6-Man teams in Nebraska alone.

THE OREGON School Activities Association is circulating a questionnaire to all school boards in the state, asking them to indicate if they desire to continue the existing championship series in various sports. Early reports indicate schools are voting 7 to 1 to retain championships in all the activities of the athletic program. Surplus snow parkas secured at a reduced price by an enterprising athletic director in the State of Oregon have been bleached and then striped like football officials' shirts. The parkas to be worn by the chain crew and down box man will assist spectators, as well as coaches and players, in quickly locating the line to gain even on rainy football nights which are frequent in Oregon during the fall season.

The Medical Association of the State of ALABAMA, through its Committee on Public Relations, has provided the Alabama high school athlete. The leaflets are conseries of leaflets for distribution to its members which outline the responsibility of the school administrator, the team physician and the parent in protecting the health of the high school athlete. The leaflets are conveniently sized and interestingly written. The Medical Association's service in this respect will contribute to the Alabama High School Association's goal of protecting the physical welfare of athletes who participate interscholastically.

The "Big Hearted" Athlete

Athletes may have bigger hearts than other persons but this is no indication that there is anything wrong with them, according to the Committee on the Medical Aspects of Sports of the American Medical Association. The AMA Committee (formerly known as the Committee on Injury in Sports) pointed out that the heart, like any other muscle of the body, becomes larger as the result of physical activity. But this does not mean that it is damaged in any way by the exercise.

There is no evidence to show that exercise has ever damaged a healthy heart in a properly conditioned athlete. In fact, the athlete's heart will not only become larger but will also become stronger, the Committee said. The myth of "athletic heart" has been exploded long ago but the belief persists in some circles. Hearts are damaged by disease

and not by participation in athletics, it was stated. The heart weakened by disease in some cases is dilated or ballooned-out but this has no relationship to the large heart of the athlete, the walls of which as a result of exercise, have been strengthened and built up in muscular bulk. The functioning of every heart presents an individual problem and thus heart disease is also a highly individual matter.

Coaches and leaders of athletics and recreational sports should watch for the following signs and encourage participants to report such symptoms themselves: (a) breathlessness, rapid pounding heart, or extreme weakness or shakiness that lasts for more than ten minutes after exercise; (b) broken sleep or unusual restlessness during the night following strenuous exercise; or (c) a definite sense of fatigue that holds over through the next day. When such signs or symptoms are reported by the player or observed by the coach or leader, referral to a physician for careful examination is in order.—National Federation and A.M.A.

The OFFICIAL SPORTS FILM SERVICE has concluded plans for the filming of a new picture, "Official Football." "Official Football" was filmed at Municipal Stadium, Albuquerque, New Mexico, with the playing personnel selected from Highland High School. Scenes were filmed during the week of October 19-24. The Football Rules Editorial Committee served as the technical staff with the Officials' crew being made up of outstanding Officials coming principally from the southwestern area states. The film is to show and demonstrate the wide variety of play rulings. Sequences will be introduced on the basis of the primary responsibilities of the various Officials, that is, Referee, Umpire, Field Judge and Head Linesman.

SUCCESS—

Success is speaking words of praise,
And cheering other people's ways;
It's doing just the best you can
With every task and every plan.
It's silence when your sneeze would hurt,
Politeness when your neighbor's curt;
It's deafness when the scandal flows,
And sympathy with other's woes.
It's loyalty when duty calls.
It's courage when disaster falls,
It's patience when the hours are long,
You'll find it in laughter and in song.
It's in the silent time of prayer,
In happiness and in despair.
In All of Life, and nothing else,
We find this thing we call Success!

FF-1S BASKETBALL SCOREBOARD

Here's the world's most popular basketball scoreboard—the FF-1S—with famous TICK-AWAY flashing numeral clock originated by Fair-Play. Shows exact number of minutes and seconds remaining in game. Accurate, dependable, and easily serviced.

Sturdy, all-aluminum alloy cabinet, fully enclosed with no exposed wiring, Non-glare, baked enamel finish. Choice of colors: gray, red, green, blue, and black, with white lettering.

Choice of 9" or 12" numbers. Scoreboard with 9" legible from 200 feet; measures 5' long x 3'5" high x 6½" deep; weighs under 100 lbs. Scoreboard with 12" numbers is 5' long x 4' high x 6½" deep; weighs 100 lbs.

Scoreboard controlled by light-weight, single-piece pressed aluminum control panel with baked enamel finish. Designed to accommodate one or two operators. Control panel is 24" long x 7" wide x 2" deep. Dual control permits simultaneous or independent operation of synchronized boards. Ten-foot cable attached, more if specified. Control panel features push-button progressive scoring for rapid corrections. Clock is quickly reset by button for new periods or overtimes.

New loud Banshee Buzzer mounted on board now standard. Super-special resonating Federal No. 55 horn available at extra cost. Extra horn may be attached at control. Clock stops automatically and sounds horn. Horn can also be sounded at will.

FF-1S Single Face Tickaway with 9 inch numerals.....\$470.00

FF-1S-12 Single Face Tickaway with 12 inch numerals.....\$520.00

FF-2S Double Faced Tickaway with 9 inch numerals.....\$859.00

FF-2S-12 Double Faced Tickaway with 12 inch numerals.....\$959.00

Cable for all of above boards, which are measured from top center of board to receptacle near timer's desk, per foot.....\$0.40

1 Cable Connector set required for each scoreboard, per set.....\$8.00

At all times we have a factory-trained mechanic, and a complete stock of parts for the above boards in our warehouse, and can make immediate shipment of these parts. If you should at any time need any of the above, we can give very good service and prompt delivery. Let us know if you would like for our representative to call and give you further information about these Fairplay boards.
