## 1942-3 Basketball Rules

The 1942-43 basketball code represents another major step in the recodification which has been in progress during the last several years.

As far as actual changes in officiating or playing procedures are concerned, there will be only one difference. This involves permission of certain players to remain in the game when a fourth personal foul occurs in an extra period. This applies to games played in twenty minute halves.

All other differences in the new code are merely clarifications or rearrangements into a more logical sequence. This change has been needed for many years but it has been thought best to proceed gradually. As the game has developed, additional rules provisions have been found necessary and these have been added wherever it seemed most convenient to place them. The game of today differs considerably from the game as it was played when the code was originally formulated. The new arrangement represents an attempt to fit the code to the current game.

### The 1942-43 Code Compared With That Of Last Year

**RULES CHANGE:** In games which are played in twenty-minute halves a player who has not been disqualified (because of having four personal fouls or for other reason) prior to the beginning of the first overtime period, will not be disqualified in any extra period because of committing his fourth personal foul. He will be disqualified in the extra period if he commits his fifth personal foul.

**Comment:** It is not intended that a player who has committed four personal fouls or who has re-entered the game twice prior to the beginning of the first extra period shall be permitted to play in an extra period. Also, no more than five personal fouls are permitted any player, even though there might be several extra periods.

### CLARIFICATIONS:

**Rule 1—Equipment:** There is no actual change with respect to equipment. However, the new rules will make it clear that either the large or the small backboard is legal and that the sewed or molded type ball is legal. The rules will not contain any statement of preference relative to either of these items.

Also, all reference to floors having an end space of less than four feet between the backboard and the end line will be omitted. It is assumed that all courts should not provide the four-foot end space.

**Rule 3 (old Rule 5):** Slight changes have been made in this rule. Numbers made of 3-4 inch wide (instead of inch wide) material will be legal.

**Rule 2 (old Rule 6):** All reference to "double referee system" will be omitted. This is because it has sometimes been misleading. There can not be two referees. One of the officials must always be designated as "The Referee" since certain specific duties are assigned to him. Among these duties is that of tossing the ball to start the game. This will be made clear. The purpose is to insure an understanding on the part of scorers and others as to who is responsible for certain matters pertaining to scoring and other specific duties.

**Rule 5 (old Rule 8):** It will be made clear that the Officials' intermission in the middle of the second and fourth quarter is to be signalled by the Scorer rather than by the Timer.

A Question and Answer will make it clear that a field goal which is scored in the wrong basket is not credited to any player but is merely added to the score of the team in whose basket the goal was made. Explanation will be in a footnote

1942-3 Basketball Rules  
(Continued from Page One)

in the scorebook.

**Rule 8** (old Rule 13): It will be made clear that only a free throw which results from a personal foul may be waived.

**Rule 10** (old Rule 15): If a substitute carries written playing instructions when he enters the game, it is a technical foul for coaching.

**REARRANGEMENT:** The new code will have the rules material grouped in ten rules (instead of the present 15).

All matters pertaining to equipment will be in RULE 1.

RULE 2 will deal with officials and their duties.

RULE 3 will contain the provisions relative to players and substitutes.

RULE 4 will contain the definitions of playing terms and these will be arranged alphabetically.

RULE 5 will contain provisions relative to scoring and timing. These provisions were in scattered sections last year. Part of them were in Rule 7, part in Rule 8, part in Rule 9 and part in Rule 11.

RULE 6 will contain playing regulations such as:

- (a) putting the ball in play to start the game, or for other jump, or after a field goal.
- (b) advancing the ball from the back court, and
- (c) termination of a half or quarter.

RULE 7 will contain out of bounds provisions.

RULE 8 will outline the procedures for free throws.

RULE 9 will list violations and their penalties.

RULE 10 will list fouls and their penalties.

# The Times Demand A Miracle

A grass roots philosopher opines that any old nag can roll over with appropriate accompaniment in the morning, but it takes a thoroughbred to do it at night after a hard day's work. The statement is applicable to the current condition of school athletic departments. Any athletic administrator can produce a good program when there is plenty of money, adequate facilities and an experienced teaching staff. The real test comes when there is a demand for an expansion of activity at a time when income is decreased, and the staff is depleted through call to the service in the armed forces or in war industries. **The present need in school athletics is more than "business as usual." It is for "more business than usual."** The problem can not be solved by ordinary measures. It takes extraordinary effort. Adversity breeds courage and strength. It gives the leader a chance to prove his ability to lead—to prove his strength and courage. The times demand a physical program that will reach every student in high school. It must be produced with or without proper tools, or adequate teaching staff, or rubber for playing equipment or school bus tires. A way must be found;—with the assistance of priorities departments if possible,—without it, if necessary.

Here are a few developments that are straws in the wind. A group of California schools cannot transport their teams for any great distance because of priority limitations. Less determined men would be discouraged and cancel athletic schedules; but not this group. For next school year, they have drawn up an interscholastic schedule for groups of 2 and 3 closely grouped schools. **Each school will provide three inter-scholastic teams (instead of one).**

A group of schools in Illinois has operated a mass basketball tournament whereby each school enters an A team, a B team and a Freshman team. Each team competes in its own class but the school tournament winner is determined by a **point system based on the accomplishment of all of the teams from a given school.**

A school in a metropolitan area recently staged a physical training demonstration in which 2,000 students participated. Another has made it compulsory for every able bodied student to participate in some form of track activity. An Iowa high school uses one corner of the athletic field for obstacle racing which includes fence climbing and trench jumping.

State Athletic Associations which have been lax in requiring a physical examination for all athletes are becoming active. Those which have been requiring only a physician's statement that an athlete may compete are interesting themselves in supplying a definite and comprehensive card form that must be used in the examination. This, in turn, is **leading to a thorough examination for all students—a development that is long overdue.**

In the Ozarks, a group of overall-clad high school boys in a marginal school district are practicing the discus throw with a stove lid from a junk pile that Uncle Sam has not yet called in. They put the shot with a 13-pound cogwheel from an old corn sheller. Yankee ingenuity is not dead and determination thrives on adverse conditions.

Each community and each state has local problems. None are beyond solution. **The times demand a physical fitness renaissance.** It ought to come under direction of the established school administration machinery. If this is not geared to fit current needs, the rebirth is still inevitable—but not under non-political supervision.

## From The Secretary's Office

### MINUTES OF THE ANNUAL MEETING

The twenty-sixth annual meeting of the Kentucky High School Athletic Association was held in the Rathskeller of the Seelbach Hotel, Louisville, on Thursday afternoon, April 6, 1942.

President Russell E. Bridges called the meeting to order at 2:15 P. M., with fifty regularly elected delegates or alternates present.

Robert Drennan moved, seconded by R. A. Demunbrun, that the minutes of the 1941 meeting of the association, which had been previously sent to all member schools, be approved without being read. The motion was carried unanimously.

The Secretary-Treasurer gave the following report on the activities of the association during the 1941-42 school year:

Two schools were suspended from the association during 1941-42 for the remainder of the school year, the Rugby University School of Louisville and the Oneida Institute.

Five hundred thirty schools joined the association this year, which is eleven less than the membership last year. One hundred seventeen schools are listed as playing football, which is a slight increase in number from last year. Eleven of these schools indicated that they were playing six-man football. Five hundred twenty-two schools entered district tournaments this year.

Fifty-nine of sixty district tournament reports have been received, showing total receipts of \$44,211.75, which is an increase over the receipts of the district tournaments last year. Twenty-five districts used the state plan for the distribution of profits.

Receipts of the sixteen regional tournaments were \$18,049.58, which is a slight decrease from last year's regional tournament receipts. Eight regions used the state plan for distribution of profits.

The gross receipts of the state tournament to date are \$14,359.60. Program advertising and expected contributions from Louisville merchants should bring this total to approximately \$15,000. Profit to the association from the tournament should be \$7,500 or more. An itemized report of tournament receipts and disbursements will appear in a forthcoming issue of the association magazine.

Five hundred two basketball officials and one hundred eighty-two football officials registered with the K. H. S. A. A. this year. This was a decrease in number from last year. There were nine football rules interpretation clinics held under the direction of Prof. M. E. Potter of Lexington. Football rules examinations were held for officials a short time after the clinics were conducted. Fifty-six officials took the examination, with eight receiving the approved rating and nine receiving the certified rating. Sixteen basketball rules interpretation clinics were conducted by Barney E. Wilson of Barbourville. Fifty-seven basketball officials took the rules examination which was held at forty sites. Fourteen officials received the approved rating and fifteen received the certified rating. The sixteen employment bureaus for officials functioned again this year.

Ninety-seven schools insured their athletes under the K. H. S. A. A. Protection Fund. One thousand two hundred eighty boys were insured for football, and one thousand one hundred fifty-nine for basketball. One hundred fifty injuries were reported. One hun-

dred sixteen claims, totaling \$1,613.75, have been paid to date. There are several spring football claims pending. The annual audit will show details of receipts and expenditures for all K. H. S. A. A. accounts.

The proposals included in the mimeographed list sent to all member schools and printed in the April issue of the magazine were then considered.

Proposal I, providing for a maximum of twenty basketball games to be played by a member school after December 31st and prior to the district tournament, was carried.

Proposal II, concerning the selection of officials by member schools of the K. H. S. A. A., was carried.

Proposal III, setting up Rules and Regulations governing track meets of the K. H. S. A. A., was carried.

Proposal IV, doubling the number of tournament districts and providing that only district tournament winners advance to the regionals, was lost.

Proposal V, providing that any boy who has ever reported for fall practice in football shall not receive further instruction or participate in football from December 1st to the closing day of school, was tabled.

Proposal VI, providing that any boy who has ever reported for basketball practice during the regular season shall not receive further instruction or participate in basketball from the time the school is eliminated in the district, regional, or state meet to the closing day of school, was tabled.

Proposal VII, providing that spring football and basketball practice be eliminated, was lost.

Proposal VIII, providing that no student who has been enrolled in high school eight semesters shall thereafter be eligible with the one exception, where the end of his eighth semester comes in the middle of the basketball season, and in that case he be allowed to finish out the season, was tabled.

Proposal IX, providing that a student may be eligible in his ninth semester if his first semester in high school was the second semester of the school year and if the student has not participated in any first team games or meets during the first semester, was lost.

Proposal X, providing that all contestants will be eligible to finish the semester in whatever sport they are engaged at the time they reach their twentieth birthday, was tabled.

Proposal XI, providing that any boy who will become twenty years old on or before November 30th shall be ineligible for football during that year, and any boy who will become twenty years old between December 1st and the third Saturday of March, shall be ineligible for basketball during that school year, was tabled.

Proposal XII, providing that any contestant may participate in athletics eight semesters in high school rather than to become ineligible on his twentieth birthday, was tabled.

Proposal XIII, providing that the teams eligible to participate in a regional tournament shall be the winners in the four districts constituting that region, was tabled.

Proposal XIV, providing for the eligibility of students during the period covered by the report card rather than by a weekly eligibility report, was lost.

Proposal XV, providing that basketball districts having more than eight teams participating in the district tournament be allowed to spend \$225.00 for overhead expenses, was tabled.

Proposal XVI, providing that the superintendent, one coach, and one principal of each member school of the K. H. S. A. A. shall be issued a pass to the State Tournament, was carried.

Proposal XVII, providing that an official be employed to keep a shot chart on all of the games played in the state meet, was carried.

Proposal XVIII, providing that the teams eligible to participate in the regional tournament shall be the winners of the upper and lower brackets in each of the four districts constituting that region, and that the bracket winners shall not meet during the district tournament, was tabled.

Earle D. Jones withdrew Proposal XIX, providing for the investment of \$5,000.00 of K. H. S. A. A. funds in Defense Savings Bonds, after the secretary reported that more than this amount had already been invested for the association. R. A. Demunbrun moved, seconded by W. L. Holland, that the secretary and the Board of Control be commended for investing a large part of the surplus funds of the association in defense bonds. The motion was carried unanimously.

Proposal XX, providing that no team shall be eligible to participate in the state tournament which has not played in at least five games in its district and regional tournaments, was tabled.

Proposal XXI, providing that the Board of Control shall not sponsor post-season or all-star games, was tabled.

Proposal XXII, changing the length of term of the Board of Control directors, was tabled.

Proposal XXIII, referring to the term of office of the officers and directors of the K. H. S. A. A. and providing for an additional director, was amended by striking out the last two sentences of the proposal which provide that the president, vice-president, and secretary-treasurer shall not serve for more than four consecutive years. Robert Martin then moved, seconded by Garrett Harrod, that Proposal XXIII, providing for an additional member of the Board of Control, a term of two years for the officers, and that the four directors shall not be eligible to succeed themselves, be accepted. The motion was carried unanimously.

The motion was made that Proposal XXIV, defining "undue influence," be accepted. The vote was 25-18 for the motion, but this was not the two-thirds majority necessary to amend the By-Laws, and the motion was declared lost.

Proposal XXV, providing that officers and directors shall be principals or superintendents of member schools of the K. H. S. A. A., was tabled.

Garrett Harrod was allowed to submit the following Proposal: "Drawings for the Regional Tournament shall be so arranged that the two representatives from a district will be placed in opposite brackets. By the toss of a coin, the two representatives will determine the bracket in which they are to compete. Teams placed in the upper bracket will draw for positions 1 to 4, and lower bracket teams will draw for positions 5 to 8." The motion was made that Mr. Harrod's proposal be tabled. The motion was lost. The motion was then made that Mr. Harrod's proposal be accepted. The motion was carried.

The election of officers and directors was then held. K. G. Gillaspie nominated Russell E. Bridges for the office of President of the K. H. S. A. A. W. J. Foster moved, seconded by Brad Jones, that the nominations cease and that Russell E. Bridges be elected

by acclamation. The motion was carried unanimously. Brad Jones nominated W. B. Owen for the office of Vice-President of the K. H. S. A. A. W. J. Foster moved, seconded by Brad Jones, that the nominations cease and that W. B. Owen be elected by acclamation. The motion was carried unanimously. Lowry Rains nominated J. Matt Sparkman for the office of director of the K. H. S. A. A., to represent regions 1, 2, 3, and 4. James B. Deweese moved, seconded by Herbert Tye, that the nominations cease and that J. Matt Sparkman be elected by acclamation. The motion was carried unanimously. H. B. Gray, Brad Mutchler, and Tom Ellis were nominated for the office of director of the K. H. S. A. A., to represent regions 5, 6, 7, and 8. The candidates were asked to retire, and after the vote was taken President Russell E. Bridges declared that H. B. Gray of Bowling Green had been elected. K. G. Gillaspie nominated C. H. Purdom for the office of director of the K. H. S. A. A., to represent regions 9, 10, 11, and 12. Robert Martin moved, seconded by Brad Jones, that the nominations cease and that C. H. Purdom be elected by acclamation. The motion was carried unanimously. John A. Dotson and Carl Hicks were nominated for the office of director of the K. H. S. A. A., to represent regions 13, 14, 15, and 16. The candidates were asked to retire, and after the vote was taken President Russell E. Bridges declared that John A. Dotson had been elected.

There being no further business, the meeting adjourned.

The dinner meeting of the association was held in the Rathskeller at 6:30 P. M., with one hundred eighteen delegates, guests, and school officials present. Members of the Male High School Glee Club gave several vocal numbers which were well received. The principal speaker for the occasion was Mr. H. V. Porter, Executive Secretary of the National Federation. Mr. Porter's talk was both informative and humorous, and was thoroughly enjoyed by all present.

## GOLF

Male High School of Louisville will be host to the State High School Golf Tournament which will be held on the Shawnee Course, May 12th and 13th. Paul Jenkins, head coach at Male, will manage the tournament. Member schools which plan to enter teams in the state meet will please communicate with Mr. Jenkins at once. Appropriate awards and trophies will be supplied by the K. H. S. A. A. Teams taking part in the tournament will be expected to pay their own expenses.

## TRACK

As previously announced in the magazine, the State High School Track Meet will be held at the University of Kentucky, Lexington, on May 15th and 16th. Bernie Shively, Athletic Director of the University, will be in charge of the meet. Mr. Shively will be assisted by Regional Managers Preston Holland, W. H. Terry, Archie Riehl, Brad Jones, John Heber, John Schaar, Walter Grabruck and Ernie Chattin.

## BASEBALL

The State High School Baseball Tournament will be held in Lexington on June 5th and 6th. The regional tournaments will be conducted one week prior to this date. Not all of the regional tournament sites have been determined definitely, but an announcement concerning this will be made by the secretary to the interested schools within a short while. Sites and managers chosen to date are: Elkton, W. G. Puryear; St. Charles at Lebanon, Rev. Fred Dudine; Louisville, Brad Jones; Newport, W. J. Foster; Maysville, Earle D. Jones; West Liberty, James Ishmael.

## REPORT OF INSURANCE CLAIMS

Ninety-seven schools insured their athletes under the K. H. S. A. A. Protection Fund—1,280 boys were insured for football, and 1,159 for basketball. 153 injuries have been reported to date. 120 claims, totaling \$1,683.75, have been paid. There are several spring football claims pending.

### FOOTBALL CLAIMS

School	Claimant	Injury	Amount Paid
Anchorage	Carl Weibel	Torn knee cartilage, operative	\$50.00
Barbourville	Glenn Perry	Fractured clavicle	4.00
Barret Manual Tr.	Hurley Israel	Loss of tooth and X-Ray	13.00
Barret Manual Tr.	Hurley Israel	X-Ray	3.00
Barret Manual Tr.	Hurley Israel	X-Ray	3.00
Barret Manual Tr.	Harold Kellen	Fractured metatarsal	25.00

Scottsville	Bill Creasy	Dislocated elbow	7.50
Shepherdsville	Gay Hamilton	Broken tooth	10.00
Simpson County	Harold Jernigan	Two broken teeth	20.00
Walton-Verona	William Piner	Broken tooth and loss of tooth	20.00

## Ned Irish And Basketball In Madison Square Garden

Edgar Stansbury  
Western Kentucky State Teachers College

We recently returned to Bowling Green from New York City where the Western Kentucky basketball team won second place in the fifth annual National Invitation Tournament in Madison Square Garden. While we were in New York, it was our pleasure to meet Ned Irish, director of basketball at the Garden—the man credited with doing more for the game of basketball than any other man since the late Dr. James Naismith who invented the sport fifty years ago.

Knowing Ned Irish, together with watching him work, is the tip-off on why basketball has been so successful in Madison Square Garden. He takes personal interest in every small detail of handling the games, and to visiting teams he extends a hospitality that makes them want to return in other years. Evidently these are some of the secrets of his success.

In our own case, he met us at the train when we arrived, escorted us in taxis to our hotel, saw that we were registered correctly and accommodated comfortably, arranged practice sessions for the squad, saw that we had tickets for the games, arranged a series of entertainments for the boys, and had someone meet us when we arrived at the Garden for the games. There wasn't anything left undone. During the game

itself, Mr. Irish supervised every little detail of the show. When the game started, there were water-buckets and towels for visiting teams, programs for the squads, seat reservations while the other game of the doubleheader was being played, and congratulations in the dressing rooms after the games.

Ned Irish is thirty-five years old. He is a Brooklyn boy, and was graduated from the University of Pennsylvania, where he wrote about college sports for Philadelphia papers. After this experience in writing, he went to the New York World-Telegram to cover college basketball and amateur sports for that paper. Overflow crowds in local college gymnasiums on basketball nights led him to the idea that the basketball fan should be better treated. He started the programs in the Garden in December, 1934, with Notre Dame vs. New York University, and Westminster vs. St. John's.

In eight years of basketball in Madison Square Garden a total of 1,820,000 persons have viewed the sport there. This season, a total of 480,000 have attended thirty-three programs. These include eighteen regular college doubleheaders, two nights of Golden Jubilee Tourney at the start of the season, eight high school quintuple-headers, four nights in the National Tournament, and the Army Emergency Relief game following the tourney. For the fifth consecutive year, the attendance records were broken during the regular season with an average attendance per game of almost 15,000.

Ned Irish believes the invitation of Western Kentucky in this year's tournament was a good thing for basketball throughout the country. It proved that a small school can compete with the big-name schools and be successful on the court. He believes that Western Kentucky's fine showing in the tournament will lend greater incentive to the high schools of that state to take more interest in producing good basketball teams because good high school teams lead to better college teams to such an extent that more national interest in the sport is automatically developed.

Ned Irish is married and has two sons. He lives with his family on Fifth Avenue, and there is a summer residence in Spring Lakes, New Jersey. We thought the high school coaches of this state would like to know something about him. Here's hoping that many of our high school players will be fortunate enough to make college teams which eventually will play in Madison Square Garden. It is a treat to meet a man as successful as Mr. Irish, a man with such cordial hospitality, and a man with such concern for the most minute business detail that will help him and the great sport he is promoting.

## Put The "Phys" In Physical Education

For years there has been going on in this country a struggle between those who believe in a rugged program of athletics and physical education and those

who prefer a gentle program of recreation in which the boys can feature their fancy sport shirts and slacks of latest style and go in for nothing that requires body contact or strenuous physical endurance. No doubt the demands upon our young men in the present war-time emergency will be greater than ever before in our country's history and this is the "big inning" for the proponents of "ruggedness." We have all been preaching that it is necessary to carry on our interscholastic athletic programs for the benefit of the boys who will soon be the men upon whom we shall have to depend for the security of our nation, but a mere "carry-on" pronouncement will not do the trick. If our schools are to do their share they must see to it that means are devised whereby our boys will be encouraged to go in for vigorous sports and games.

Walter B. Spencer, executive secretary of the Connecticut association, has produced the best editorial on the subject yet printed in any of our high school journals in which he lambasts the schools for taking the attitude that we are to "let the Army, the Navy, the Air Service do the job." He jibes us for keeping our youth occupied merely with pleasurable tasks and games. "As for our gymnasiums, now stripped of all semblance of body building exercises," says Mr. Spencer, "the program there must consist of table tennis, badminton, social dancing and drop-the-handkerchief type of games. We must be content with brave expressions such as 'broadening the physical education program' or 'making more dynamic the program of intra-mural sports and games.' And most of us are forced to stop right there because there is little or nothing dynamic in any program of physical education or intra-mural sports as now practiced. There is no specific end in view; no spark to kindle red blood interest."

Harking back to the days when there were no "pink tea" scenes in the physical education drama, Mr. Spencer winds up his splendid article by saying, "In this emergency I believe

that we who know the value of body building for competitive sports should work for the restoration of a physical education program which has not lost its "phys"; for an athletic program geared to the times; for a program for both boys and girls which will give them an actual foretaste of what is in store for them.

In this way our nation's armed forces will benefit immeasurably and this unholly war will be ended, victoriously, that much sooner. Isn't this common sense and a practical program for our Youth today?"

We believe Brother Spencer has something there.

## The National Front

**MAINE:** Harrison C. Lyseth, who has been Secretary of the state association of Maine for thirteen years, has resigned his position because he has been promoted to the Superintendency of the Portland schools. Mr. Lyseth has been very active in state high school athletic work and he has been a strong force in developing an efficient state association. In general, the New England states have not been especially active in National Federation work. Maine and Connecticut are exceptions. They have been valuable members of the National Federation, Connecticut having become a member in 1926 and Maine in 1939. Mr. Lyseth and his board of control have been of great assistance in helping form National Federation policies and in securing some degree of adherence to them in the state of Maine. The best wishes of the Federation are extended to Mr. Lyseth in his new work.

Earl Hutchinson is now the Director of Secondary Education and he has been elected Secretary of the Maine state association. There is every reason to believe that Mr. Hutchinson is in hearty accord with the various policies which have been sanctioned by Mr. Lyseth and his board of control. A hearty welcome is extended to him.

**OHIO:** A new office has been created by the Ohio Legislature. It is that of "State Supervisor of Health, Physical Education, Recreation and Safety." The man who has been chosen by the State Director of Education to fill this position is Paul E. Landis. Mr. Landis has been in the athletic department of Bowling Green State University.

**NEW YORK:** New York is interested in proposed legislation relative to various phases of the athletic program. The latest bill is one which would create a sort of "super-board" for boys' athletics. The bill proposes that athletic matters be placed in charge of a committee composed of "six physical educators and coaches and three administrators." The board would be endowed with broad powers, many of which are now centered in the state department of education.

The bill would greatly affect the present organization whereby the direction of athletic policies and programs is in charge of the nine sections of the state athletic association.

Another bill would create a Supervisor of Athletics who would be a part of the physical education staff in the state department of education. Still another would provide for possible extension of the athletic accident plan which is now operated by the New York State Association. This bill would permit the covering of all high school students regardless of whether or not they are engaged in athletic activities.

**TOURNAMENT ATTENDANCE:** At the final session of the Minnesota state basketball tournament, the attendance was approximately 15,000. This is a record for the event. In Illinois and Indiana, the final tournaments drew more than could be accommodated. This is not unusual, but it is interesting to note that attendance did not seem to be reduced because of war activities or priorities problems.

Utah reports a record attendance for their final tournaments.

**FLORIDA:** The Palmetto case, which was carried to the Supreme Court in Florida and which attempted to set aside the power of the state association to suspend a member, has finally been settled. Originally, the Supreme Court upheld the right of the state association to enforce its rules. The school, which had been penalized, made an appeal for a review of the case. This appeal has been denied and consequently the suspension is in effect and probably will be until such time as the offending school reimburses the state association for the amount which it was necessary for the association to spend in court costs.

## EXECUTIVE COMMITTEE MEMBERS OF THE NATIONAL FEDERATION

In former issues of this publication, the pictures of members of the National Federation Executive Committee have been carried along with quotations concerning high school athletic work. The pictures of the remaining two members are on this page. These men, along with their co-workers, have been rendering a service to all high school athletic departments. This page is a slight token of appreciation for those services on behalf of the high school men of Kentucky.

**W. B. SPENCER, New Haven, Connecticut**

"Twenty-seven associations operate athletic accident benefit plans. Their reports give a broad picture of the nature, time, place and cause of injuries. The National Federation should establish a central clearing house for studying the results and applying them to a nationwide safety program. Let's have it!"

**B. C. ALWES, Donaldsonville, Louisiana**

"When the staid South adopts and uses a group of publications that emanated originally from and for another section, there must be a noteworthy reason. There is! All National Federation publications are issued to assist all high schools to achieve their objective of effective health and physical fitness through athletic contests. All sections of the United States find these publications invaluable.

"The value lies in their very nature, the rules books are supplemented by reports, interpretations, and bulletins to give uniform understanding. This value is enhanced by the authoritativeness of the publications. All materials are released only after extensive study and all actions are based on results of scientific tests and experiments conducted by competent staffs of experts."

## THANKS!

During the past school season our Kentucky schools have given us a lot of nice orders, and for this we now say, "Thank you."

Should you need some personal equipment for your summer vacation, just drop us a line. Our wholesale prices are always open to both your school and to you as a teacher.

Remember—"It Pays To Play"

**THE SUTCLIFFE CO.**  
LOUISVILLE, KY.
